Ryan Owens DFA

Test Cases:

Accepted -

1. Var a
2. a = 5
3. print (a)
4. *- Writing Comments is Good Practice -*
5. a = 5 + 7

Rejected –

1. var z = 7   (cannot initialize variable upon declaration in grammar)
2. {print (z)}   ({} are invalid characters in our grammar)
3. print (z = 5)   (printStatement doesnt allow assignmentStatement's)
4. *- This Comment Should Fail *-   (-* is required to end a comment)
5. z = 3 + 4 − 2   (- is not a valid intOp)
